

DAVID ARREBA

PRODUCT DESIGNER — DESIGN SYSTEM SPECIALIST

+353 89 216 2281 | davidarrebacorr@gmail.com | davidarreba.framer.website | D08RH36, Dublin

ABOUT ME

I'm a Product Designer with three years of experience, adaptable and resourceful when working on both individual and team-based projects.

Naturally curious and proactive, I'm currently exploring how to integrate AI into the design process to streamline workflows, boost efficiency, and elevate the overall quality of my work. I'm always eager to take on new challenges that allow me to grow as a designer and contribute to meaningful digital products.

OTHER SKILLS

Advanced knowledge of photo and video editing using Adobe Creative Suite (Photoshop, Lightroom, Premiere Pro, etc.).

Intermediate skills in 3D design and animation with Blender.

Basic experience in 2D motion graphics and animation using After Effects.

EDUCATION

Bootcamp UX/UI Design 2021
Neoland

Audiovisual Communication 2016 - 2020
University of Burgos

EXPERIENCE

Redbility (UX Consultant) November 2023 - December 2025

Inditex

My time at Inditex was divided into two distinct phases, both focused on Design Systems but applied to different products:

- Sewing DS: Collaborated on the maintenance and scalability of Inditex's internal Design System. Led cross-functional ceremonies with development teams and design verticals to ensure consistency, adoption, and system evolution across internal tools.
- Multitenant DS: Spearheaded the creation of a multi-brand Design System to unify the digital presence of all Inditex e-commerce brands while preserving individual brand identities. Managed the full lifecycle — from defining design tokens and building scalable components to overseeing handoff and integration with development teams.

Acciona

Contributed to the creation of Acciona's corporate web Design System — components, modules, and page templates. Ensured full WCAG accessibility compliance for an inclusive, future-proof framework.

UCI (Unión de Créditos Inmobiliarios)

Played a strategic role in defining and launching UCI's Design System. Collaborated closely with development to define workflows and foundational system structures. Supported product teams with UX research and user-centred visual design across digital applications.

Accenture (Product Designer) January 2023 - November 2023

Aena

Designed intuitive and engaging user interfaces for Aena's digital products while contributing to UX research and early-stage product ideation. Maintained continuous collaboration with development teams and stakeholders to deliver cohesive, functional, and user-friendly digital solutions.

Aluxion (Product Designer) February 2022 - November 2022

Delivered end-to-end UI/UX design for clients including HLA Group (Asisa), CBRE, El Referente, and Mitte — covering wireframing, high-fidelity design, and interactive prototyping. Applied interaction design principles and adapted solutions to each client's brand and product needs. Supported product strategy via UX research methods such as user interviews and competitive benchmarking.
